Acknowledgment is made of applicant's election of method claims 13-15 for prosecution on the merits. It is noted that applicant's 9/15/04 election is "with traverse". However, no reasons were presented for the traverse. Accordingly, this election is being treated as being without traverse until applicant presents reasons for the traverse.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Palmer.

In Palmer, 10 may be termed a first ramp portion, 16 may be termed a first section, 13 may be termed a second section, and 17 may be termed a second ramp portion. In use, firstly, the vehicle moves up the first ramp portion onto the second section. Secondly, the second ramp portion is placed on the first end of the first ramp portion. Thirdly, the vehicle is moved onto the second ramp portion. Note that since element 17 is capable of being tipped so that it is inclined, element 17 may properly be termed a ramp portion.

Claims 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or

linking claim. Election is being treated as being **without** traverse since the reply filed on 9/15/04 presents no reason for the traverse.
